

# BEVERAGE CONTAINER RECYCLING EXPANDING IN MANITOBA

**New recycling bins** will begin appearing this spring and summer at concerts, public buildings, malls, convenience stores and gas stations.

**This expanded recycling program** is operated by a not-for-profit organization called the Canadian Beverage Container Recycling Association (CBCRA). The CBCRA was created by beverage companies to increase recycling.

**A two cent container recycling fee** (CRF) will go towards expanding recycling across Manitoba, including an extensive away-from-home recycling program.

**Approximately 30% of beverage containers are consumed away from home** and that's why it's important to make recycling far more convenient. By recycling more, we are working together to make Manitoba a green leader.

**For more information please contact CBCRA at 204.942.2284 or [www.cbcra-acrcb.org](http://www.cbcra-acrcb.org)**
